Step 1

Before starting the assembly, align properly the 6 "A" elements as shown below.

Prima di iniziare il montaggio, allineare correttamente i 6 elementi A come illustrato.
Avant de commencer le montage, alignez correctement les 6 éléments A comme indiqué.

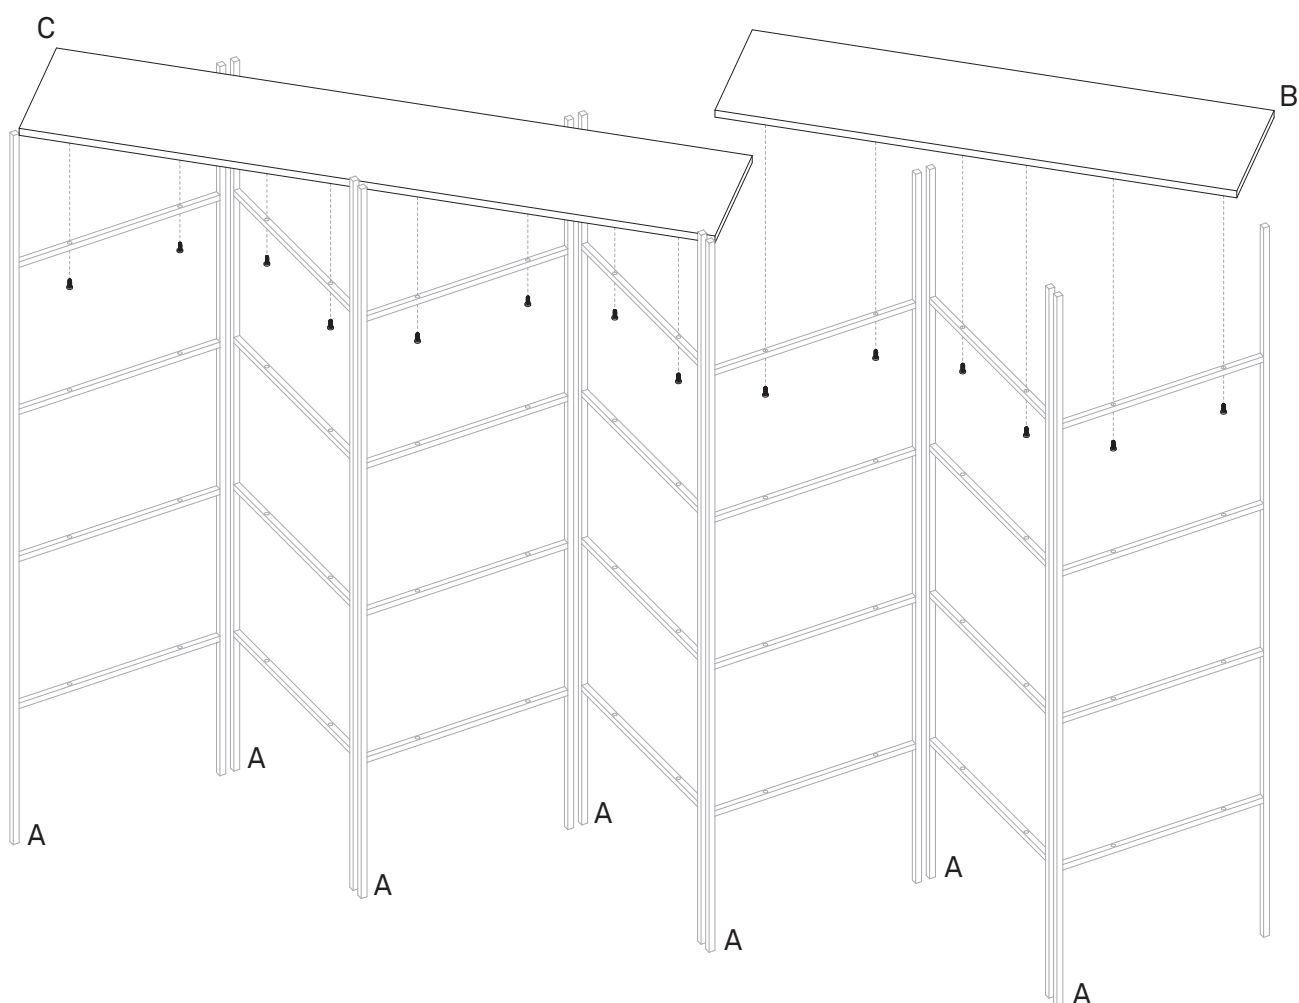

true

Step 2

Proceeding from the top to the bottom of the structure, secure first the shelf B and the shelf C to the elements A through the 14 M6x16mm screws.

Partendo dall'alto verso il basso, fissare per prima agli elementi A la mensola B e la mensola C tramite le 14 viti M6x16mm.
En procédant du haut vers le bas de la structure, fixez le premier support B et support C aux éléments A avec les 14 vis M6x16mm.

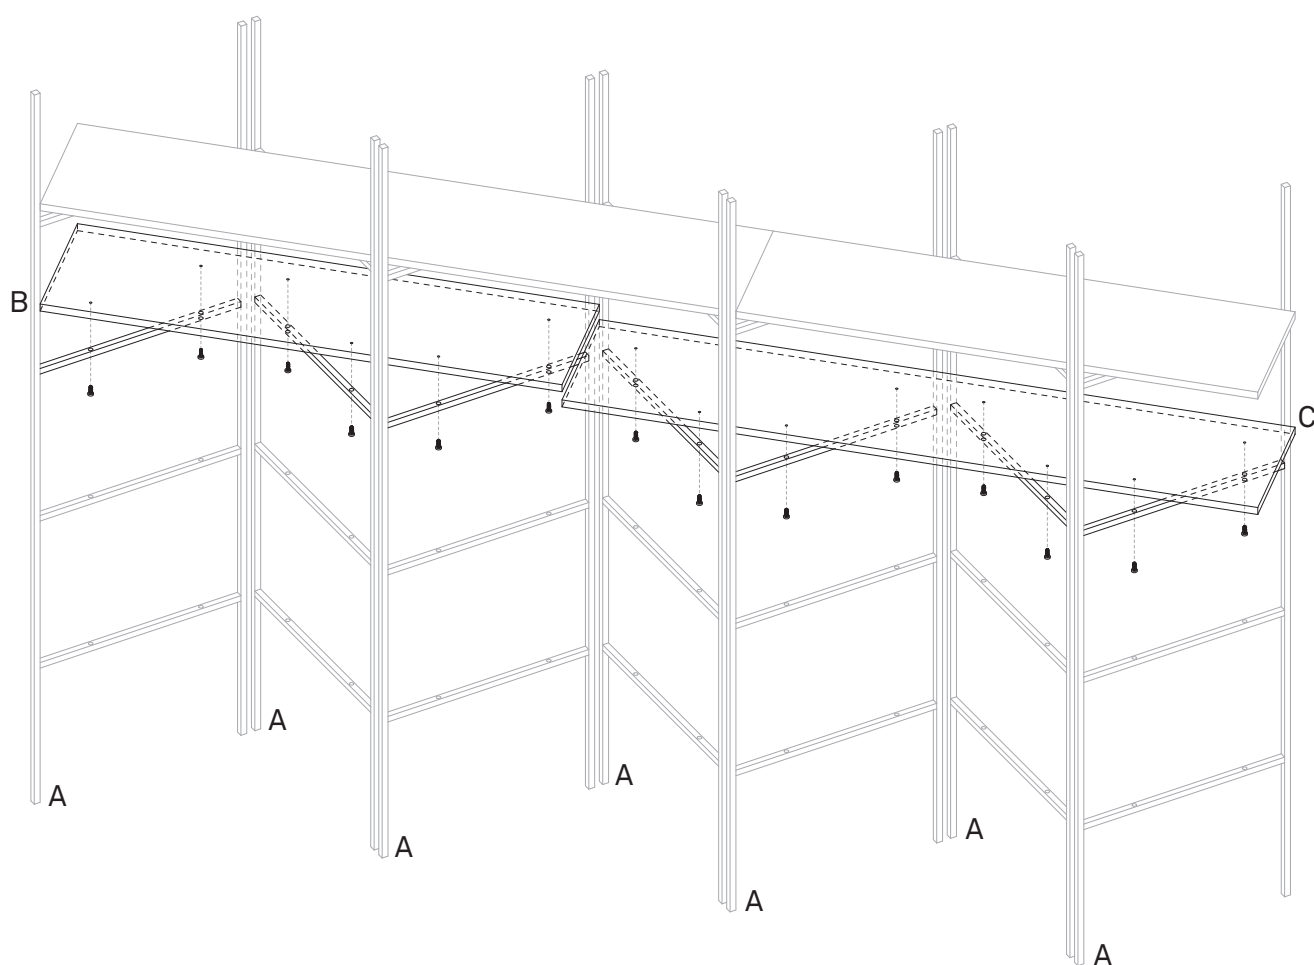

true

Step 3

Proceeding from the top to the bottom of the structure, secure second the shelf B and the shelf C to the elements A through the 14 M6x16mm screws.

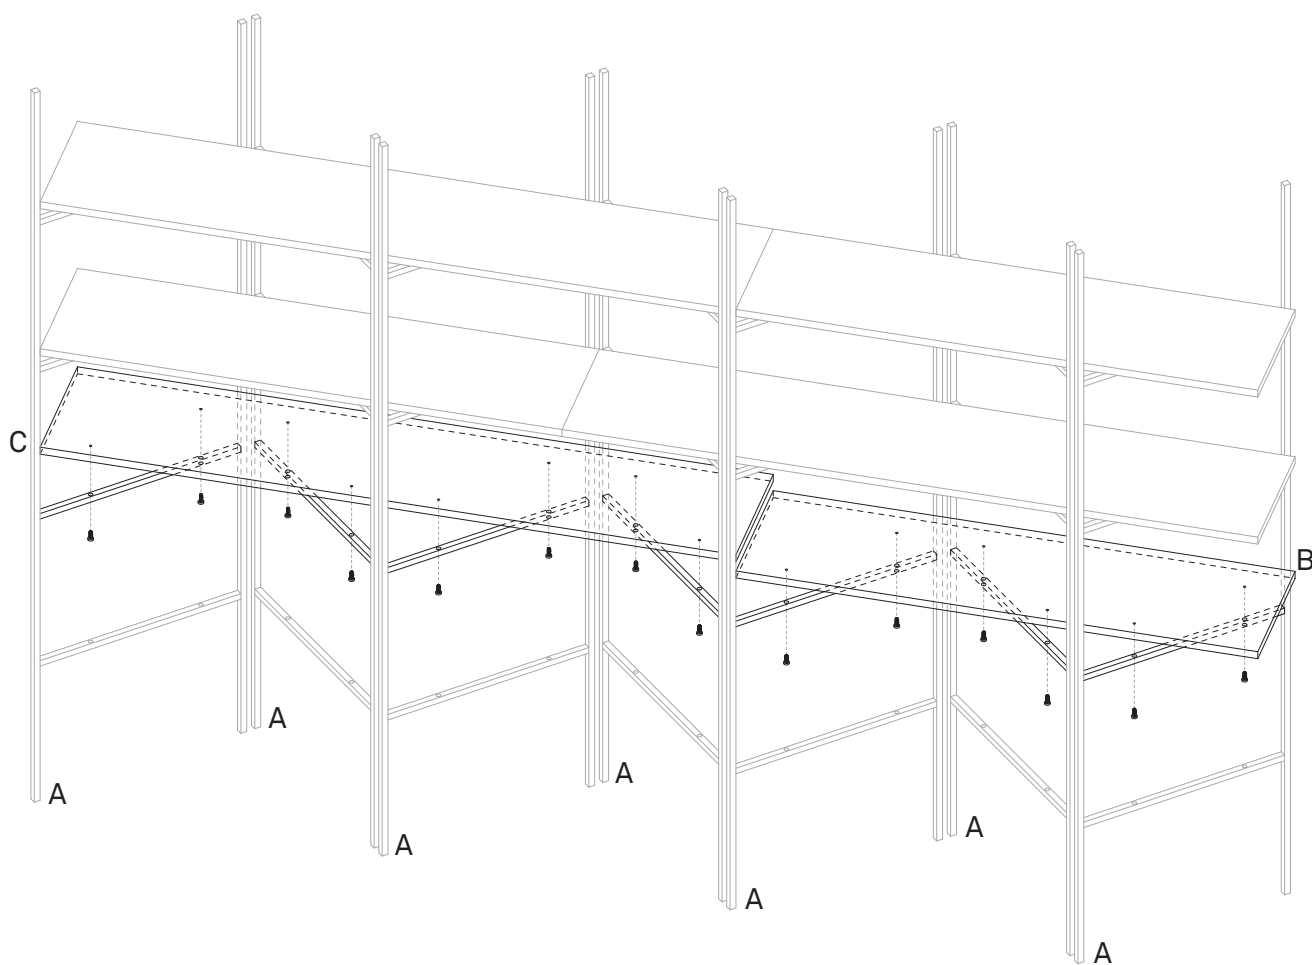

Partendo dall'alto verso il basso, fissare per seconda ai quattro elementi A la mensola B e la mensola C tramite le 14 viti M6x16mm.
En procédant du haut vers le bas de la structure, fixez deuxième le premier support B et support C aux éléments A avec les 14 vis M6x16mm.

Step 4

Proceeding from the top to the bottom of the structure, secure third the shelf B and the shelf C to the elements A through the 14 M6x16mm screws.

Partendo dall'alto verso il basso, fissare per terza ai quattro elementi A la mensola B e la mensola C tramite le 14 viti M6x16mm.
En procédant du haut vers le bas de la structure, fixez troisième le premier support B et support C aux éléments A avec les 14 vis M6x16mm.

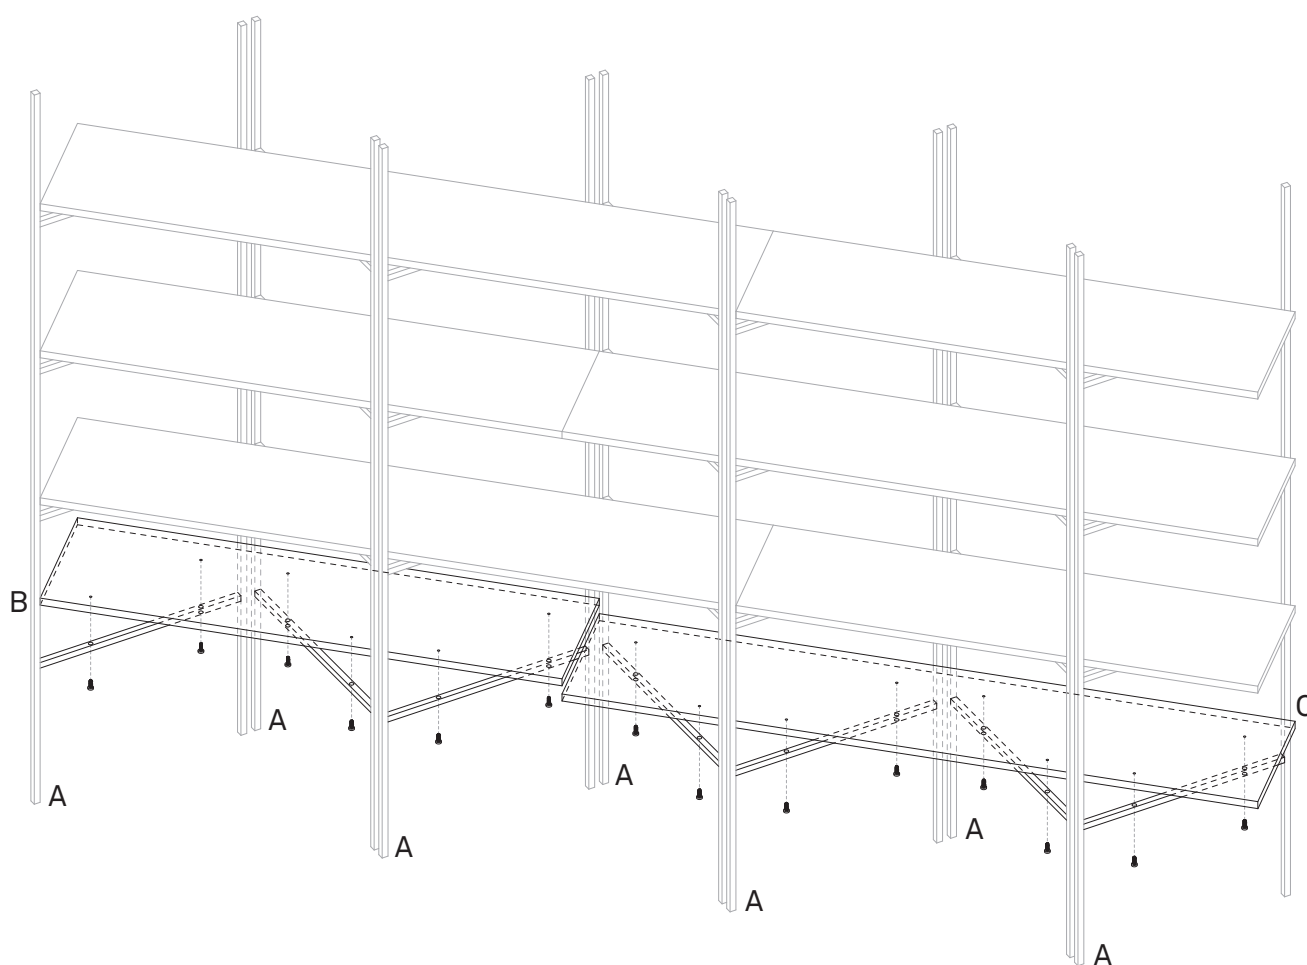

true

Step 5

Proceeding from the top to the bottom of the structure, secure last the shelf B and the shelf C to the elements A through the 14 M6x16mm screws.

Partendo dall'alto verso il basso, fissare per ultime ai quattro elementi A la mensola B e la mensola C tramite le 14 viti M6x16mm.
En procédant du haut vers le bas de la structure, fixez troisième le dernier support B et support C aux éléments A avec les 14 vis M6x16mm.

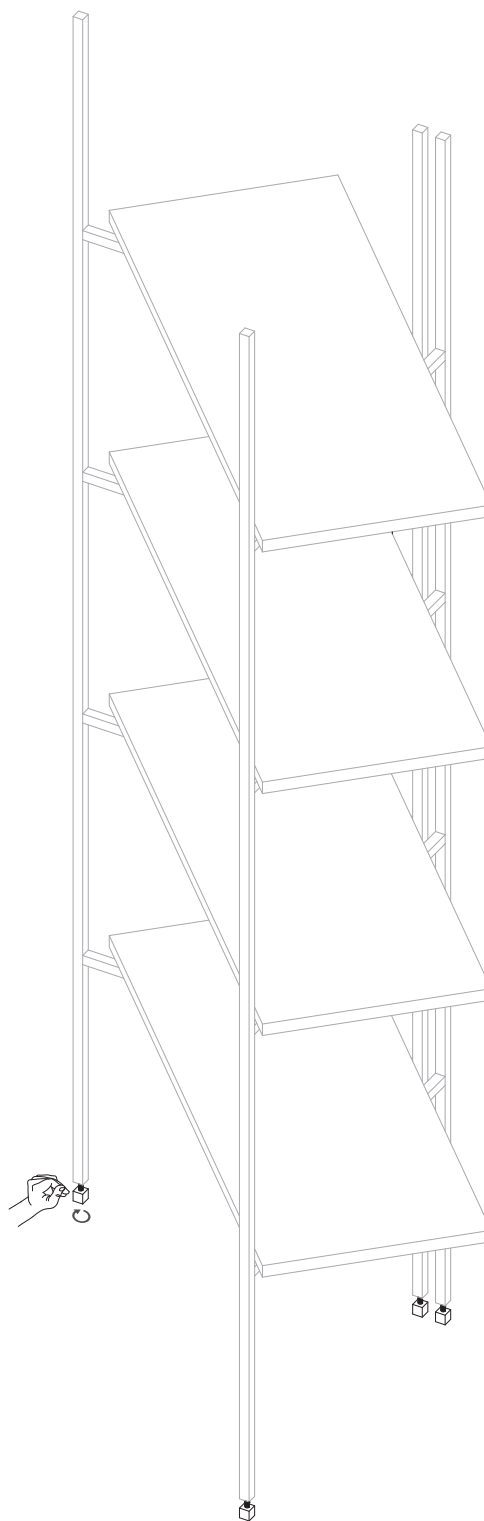

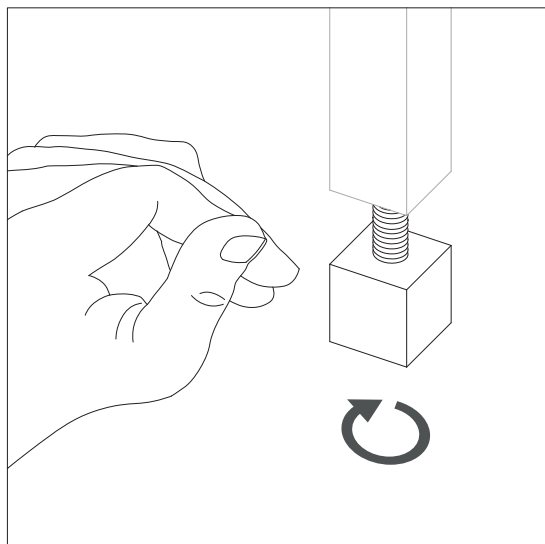

true

Step 6

If you have adjustable feet, screw them at the desired height to ensure stability on the floor.

Se si dispone dei piedini regolabili, avvitarli fino all'altezza desiderata che garantisca stabilità sul piano.

Si vous avez des pieds réglables, vissez-les à la hauteur souhaitée qui assure stabilité sur le sol.

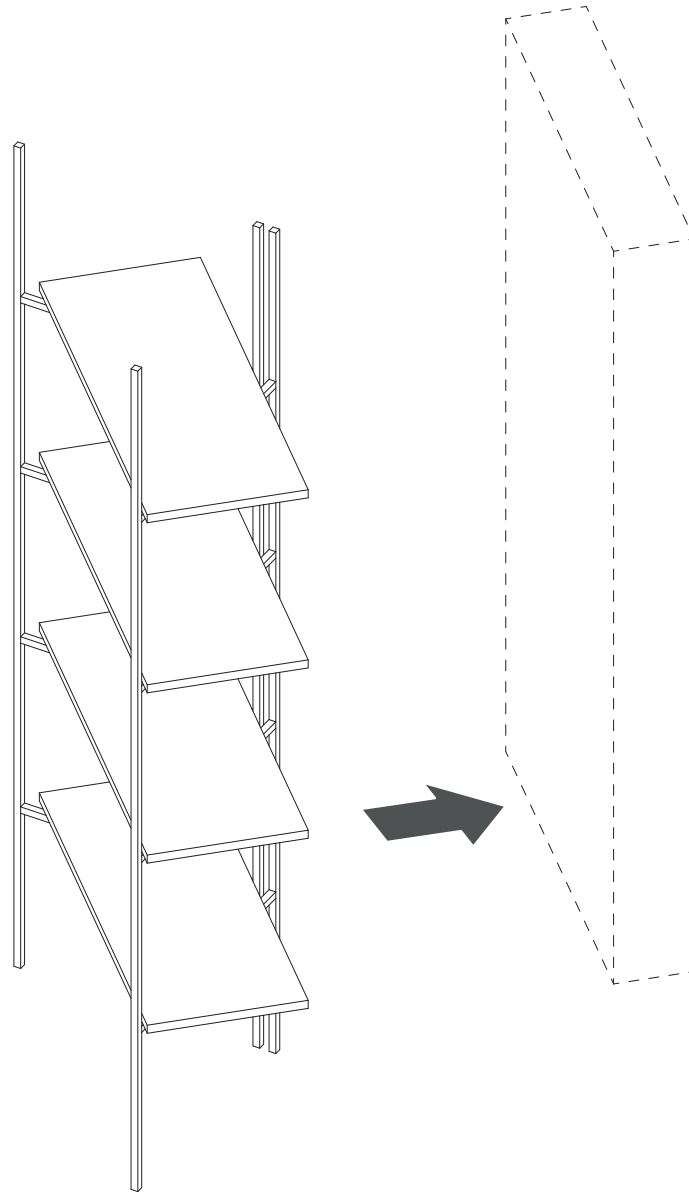

true

Step 7

If you have the wall-mounted kit, bring Ethrio close to the reference support.

Se si dispone del kit fissaggio a parete, avvicinare Ethrio al supporto di riferimento.

Si vous avez le kit de fixation murale, rapprochez Ethrio au support de référence.

Only if you have both the mounting kit, for the wall and for the floor, follow the steps in this order:

Solo se si dispone di entrambi i kit fissaggio, sia per parete sia per pavimento, seguire gli step in questo ordine:
Seulement si vous avez tous les deux kit de montage, pour le mur et pour le sol, suivez les étapes dans cet ordre:

step 7
step 8
step 9
step 10
step 13
step 14
step 11
step 12
step 15

true

Step 8

Before fixing the two "D" and "E" elements, please follow strictly the under instructions.

Prima di iniziare il montaggio dei due elementi D e E, attenersi alle indicazioni qui di sotto riportate.

Avant de commencer le montage des deux éléments D et E, suivez les instructions ci-dessous.

Select the "A" element with column closest to the support

Scegliere l'elemento A che abbia la colonna più vicina al supporto

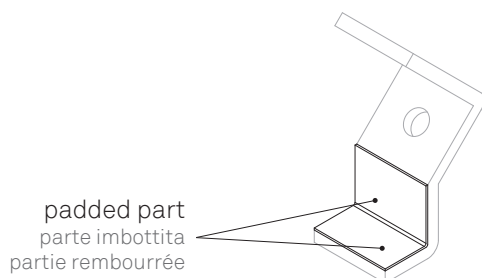

Choisissez l'élément A dont la colonne est la plus proche du support

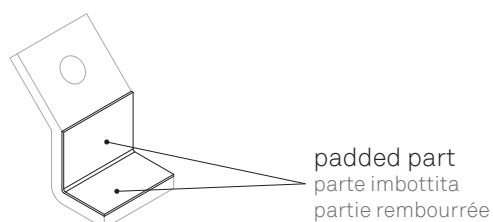

Place elements D and E in the suggested points ●

Posizionare gli elementi D e E nei punti suggeriti ●

Positionnez les éléments D et E aux points suggérés ●

D

E

Locate the 2 elements on the column using the padded part

Appoggiare alla colonna i due elementi dalla parte imbottita

Placez les deux éléments sur la colonne du côté rembourré

true

Step 9

Once selected the position on the column where "D" and "E" elements should be inserted, drill the support aligned with the "D" element hole.

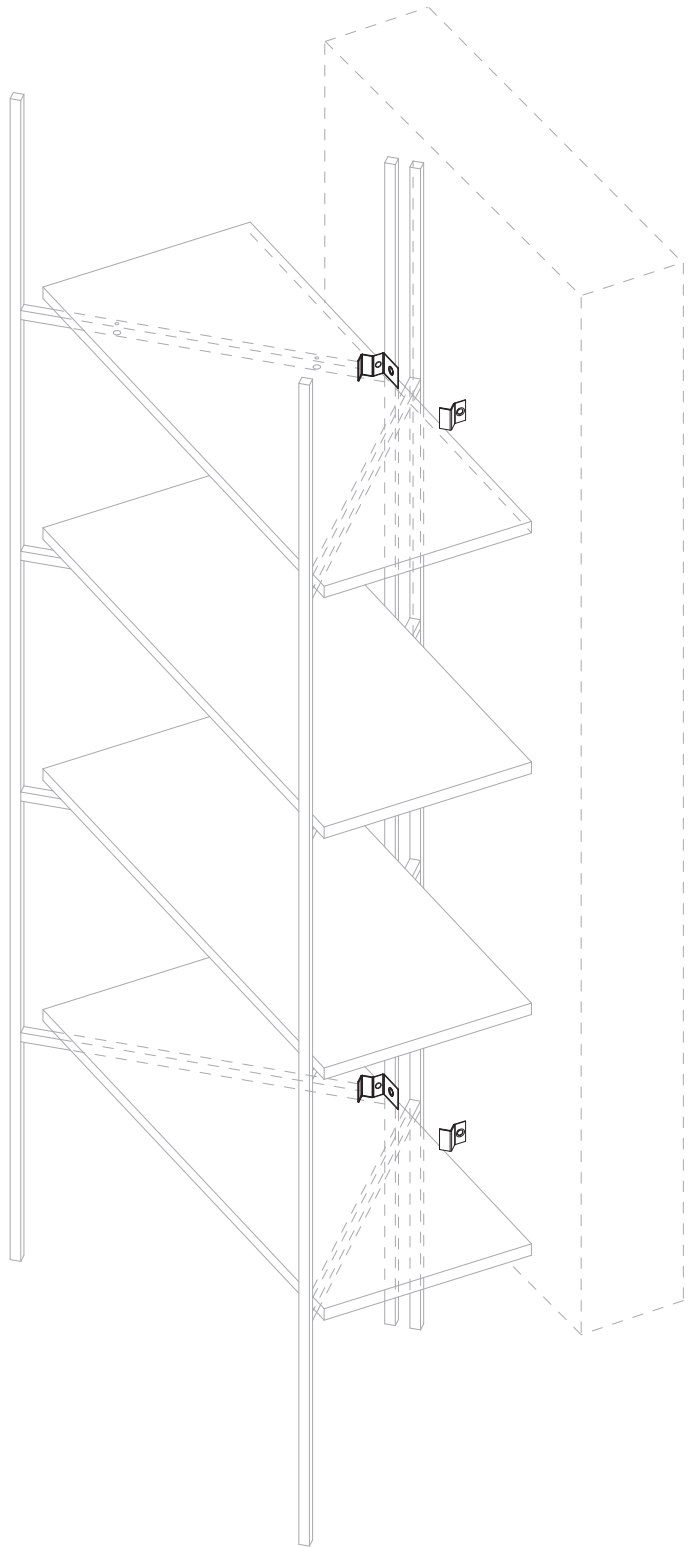

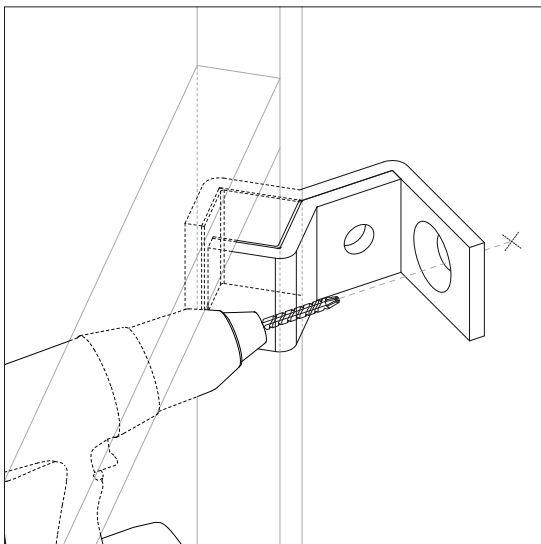

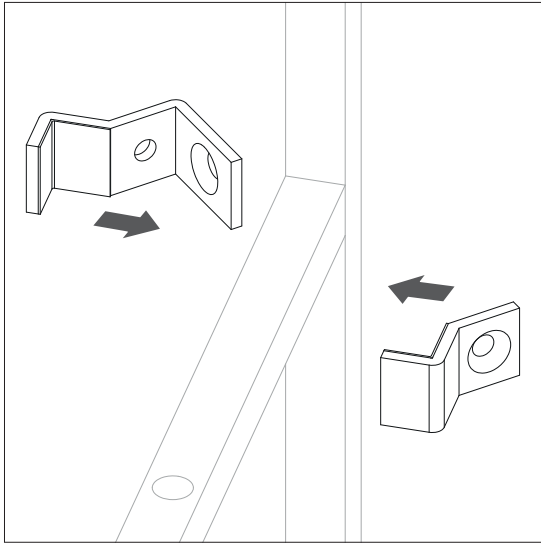

Repeat the procedure on the other columns with the other available D and E elements.

Scelta la posizione lungo la colonna dove inserire gli elementi D e E, forare il supporto in allineamento al foro dell'elemento D.

Ripetere il procedimento sulle altre colonne con gli altri elementi D e E a disposizione.

Après avoir choisi la position où les éléments D et E doivent être insérés, percez le support en alignement avec le trou de l'élément D.

Répétez la procédure sur les autres colonnes avec les autres éléments D et E disponibles.

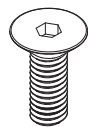

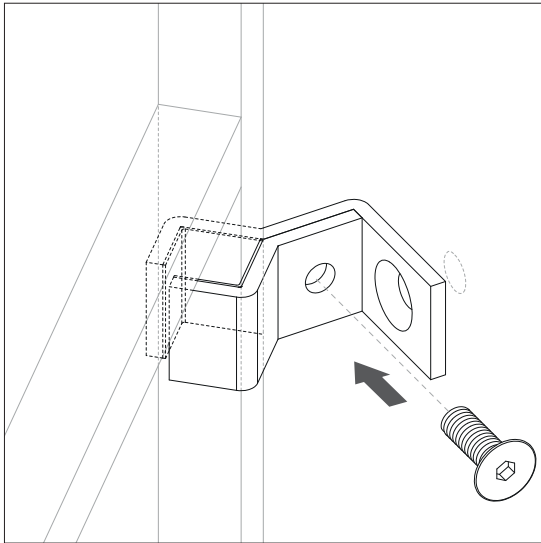

true

Step 10

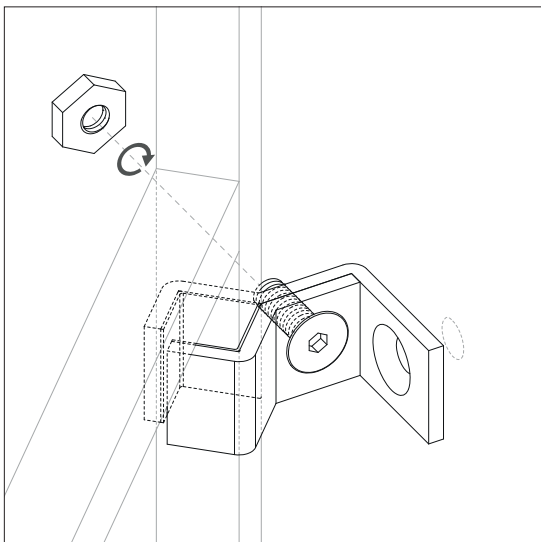

Secure the 2 elements "D" and "E" using the M6x14mm screw and consequently block with "F" nut.

Fissare i due elementi D e E con la vite M6x14mm e successivamente bloccare con il dado F a disposizione.

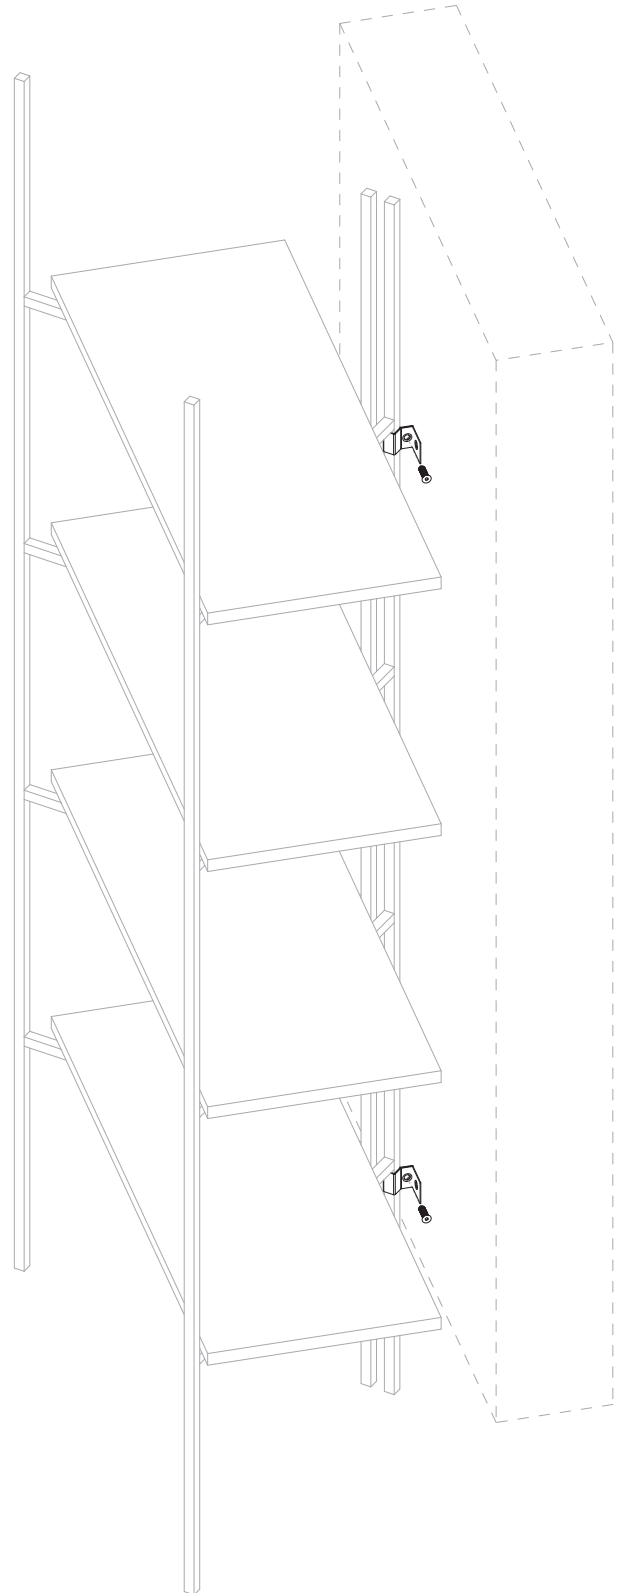

Fixez les deux éléments D et E avec la vis M6x14mm, puis bloquez-les avec l'écrou F fourni.

M6x14mm

F

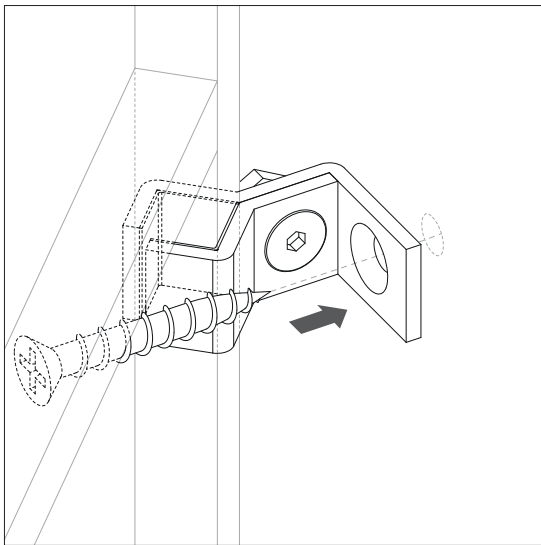

true

Step 11

Secure each Ethrio column to the support (if in wood) with the two chipboard screws.

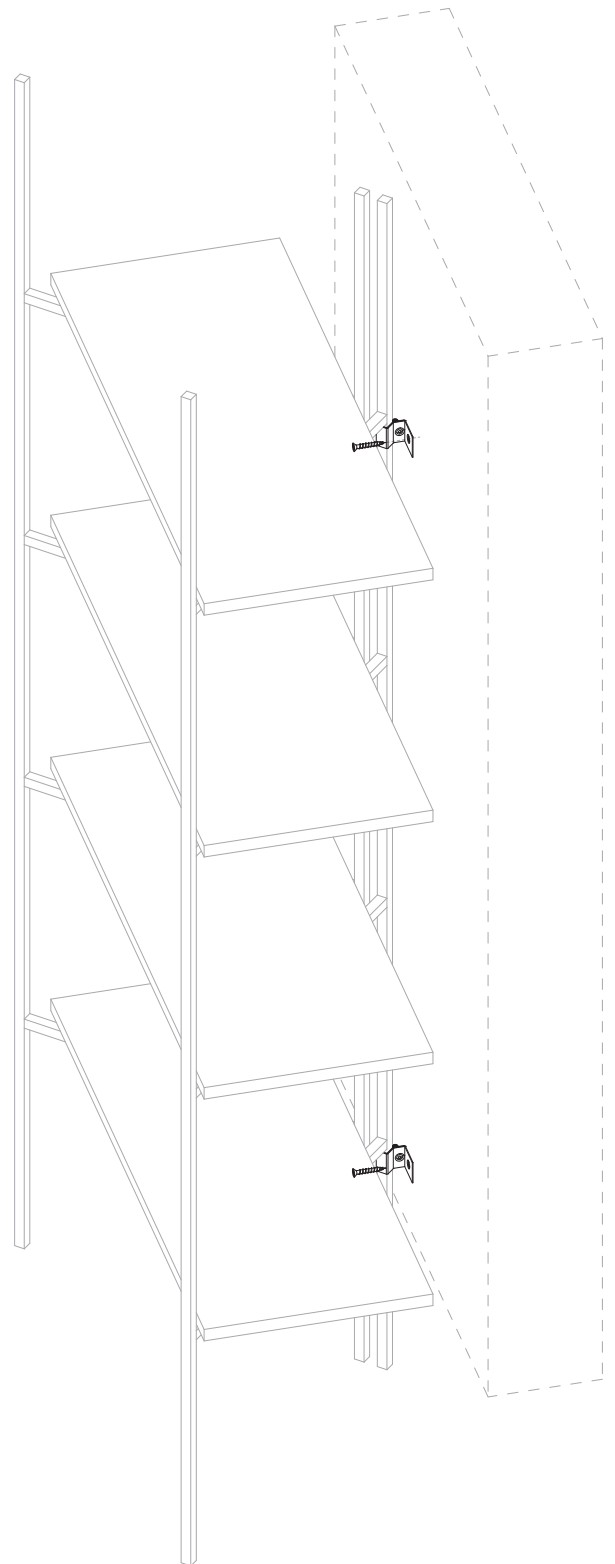

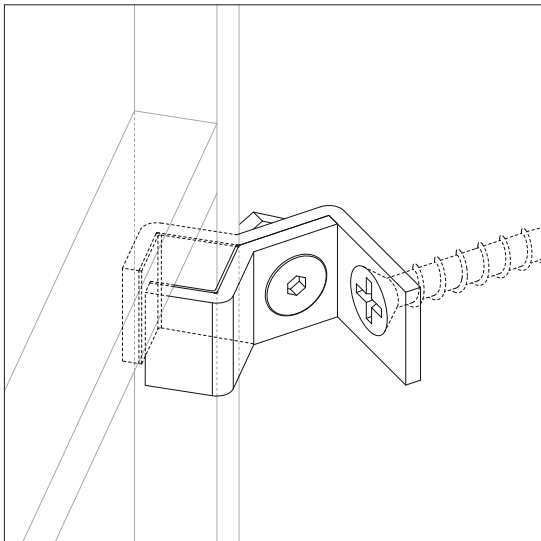

Fissare ogni colonna di Ethrio al supporto (se in legno) con le due viti truciolari.
Fixez chaque colonne de Ethrio au support (si en bois) avec les deux vis à aggloméré.

for wood wall

d'aggloméré

G

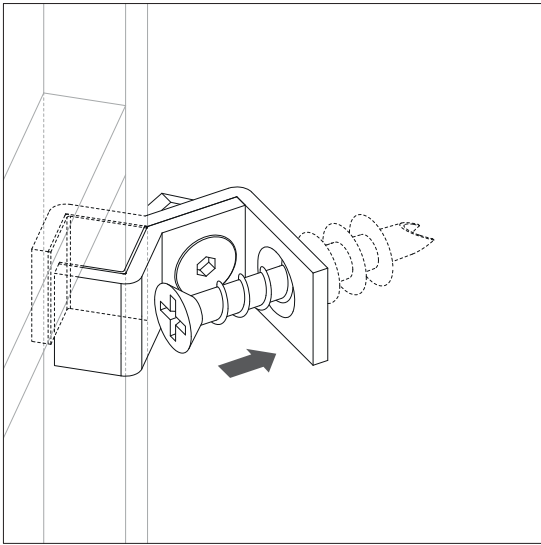

true

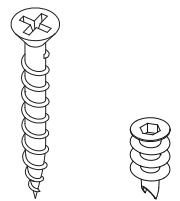

Step 12

Use the proper screw and insert according to your specific type of wall composition.

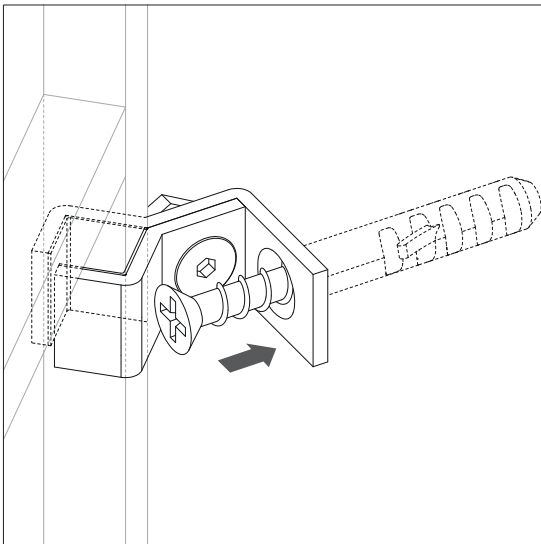

A seconda del supporto, utilizzare la vite e il tassello corrispondente.
En fonction du support, utilisez la vis et la cheville correspondantes.

true

Step 13

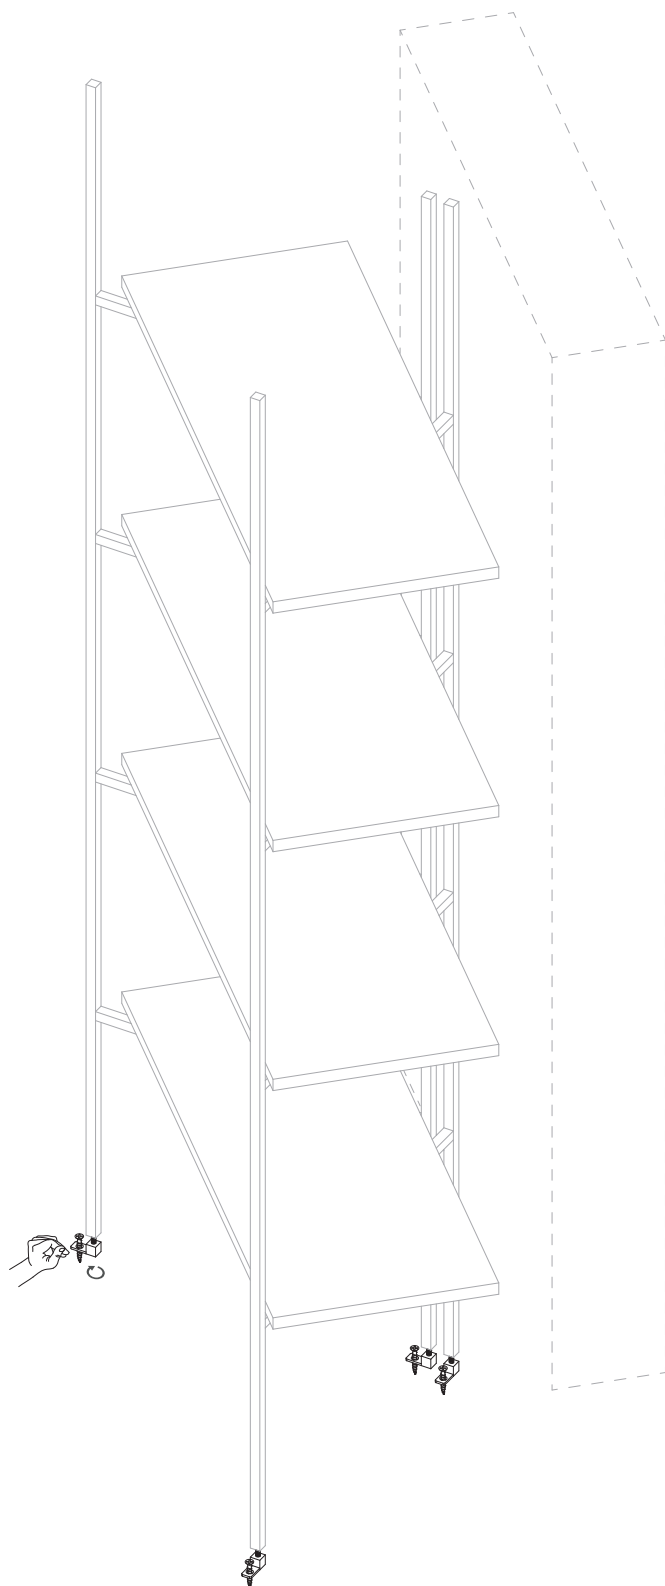

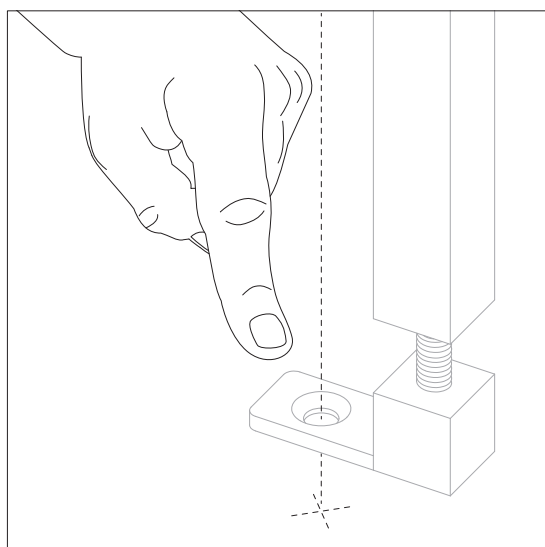

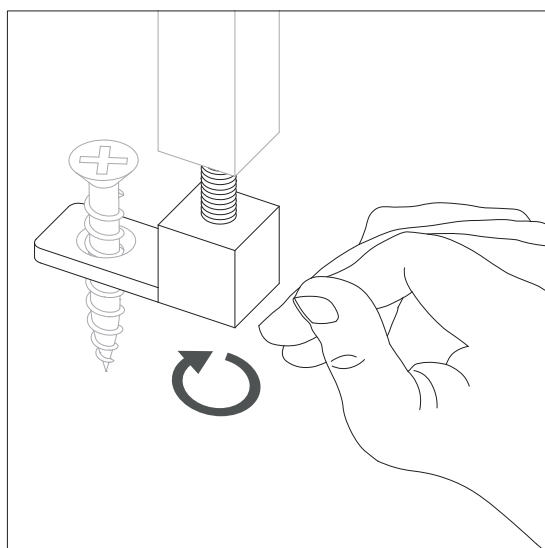

If you have the floor mounting kit, remove the screw and adjust the feet at the desired height.
Later mark the point where the floor must be drilled.

Se si dispone del kit fissaggio a pavimento, rimuovere la vite e regolare i piedini fino all'altezza desiderata.

Successivamente segnare il punto dove forare nel pavimento.

Si vous avez le kit de fixation au sol, retirez la vis et réglez les pieds à la hauteur souhaitée.

Ensuite marquez le point dans lequel percer le sol.

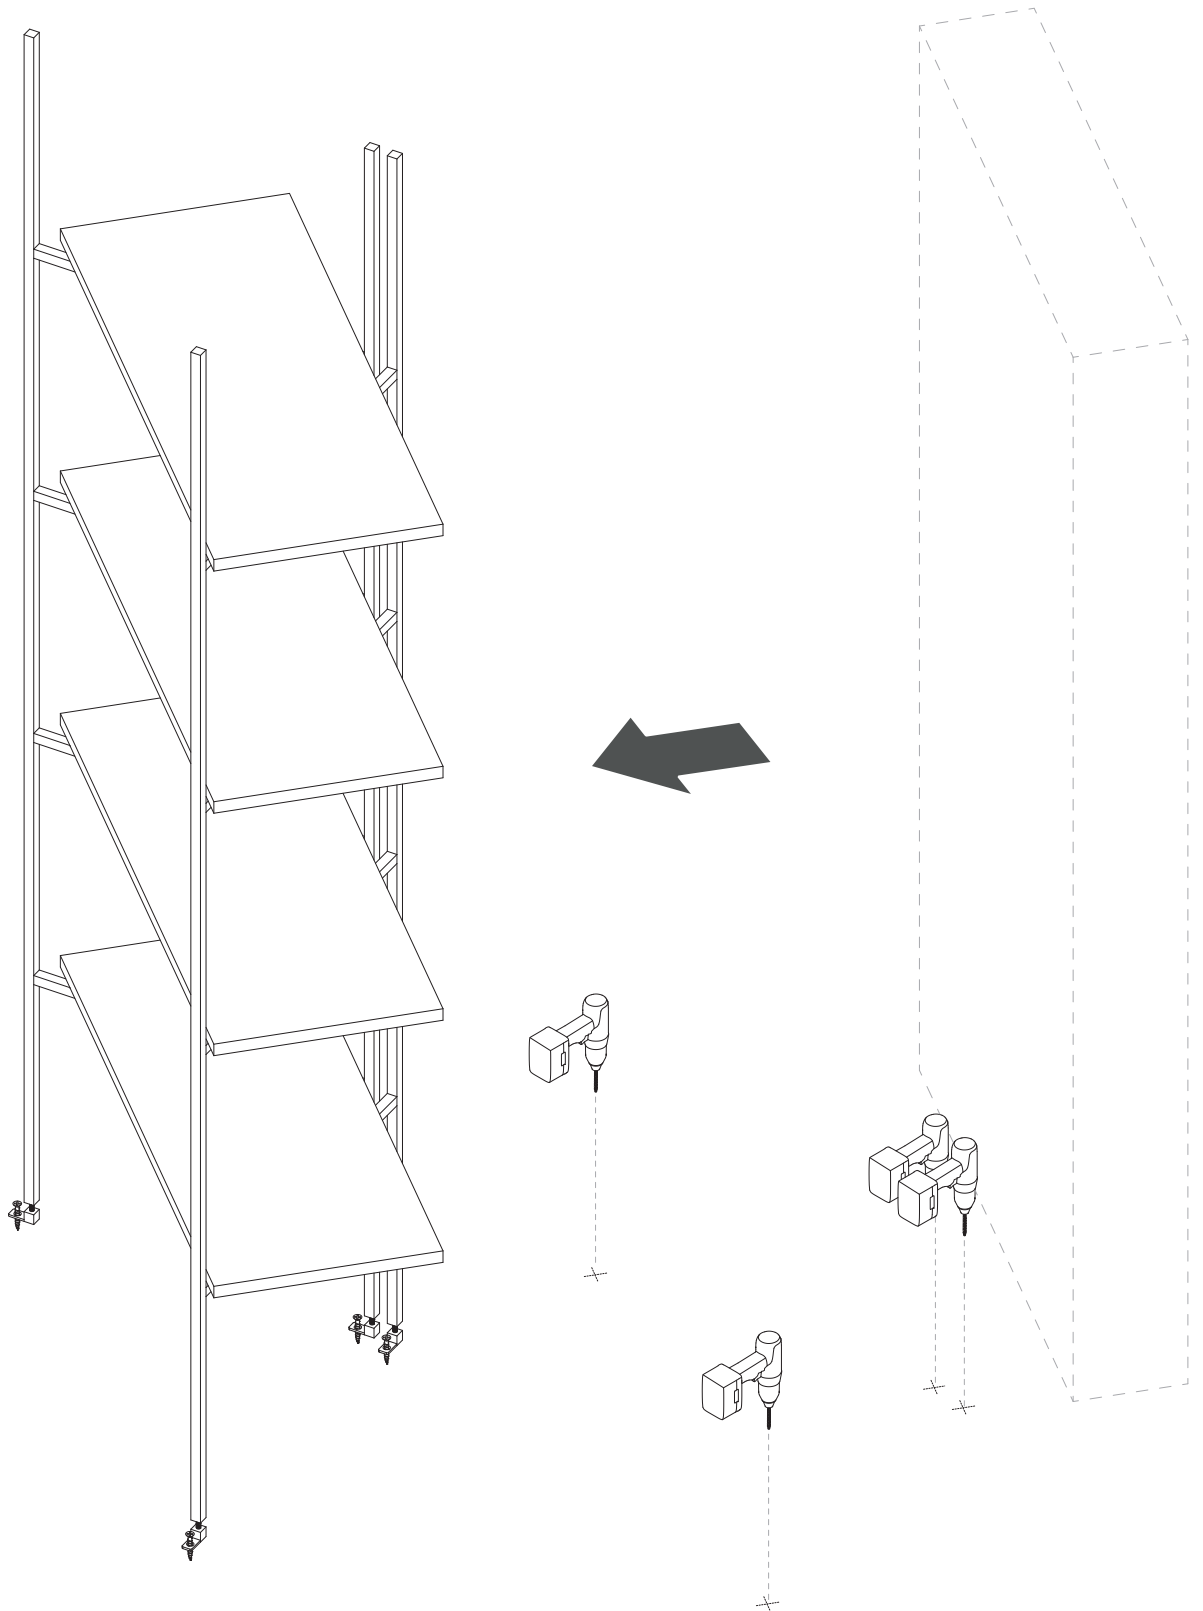

true

Step 14

Remove Ethrio before drilling the floor in the previously marked points.

Rimuovere Ethrio prima di forare il pavimento nei punti contrassegnati in precedenza.

Removez Ethrio avant de percer le sol dans les points précédemment marqués.

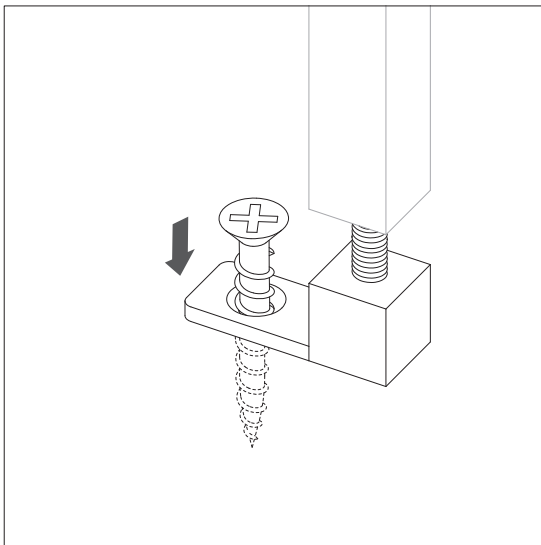

true

Step 15

According to the type of the floor, to secure the feet, use the corresponding screws and dowels.

A seconda della tipologia del pavimento, per fissare i piedini, utilizzare le viti e i tasselli corrispondenti.

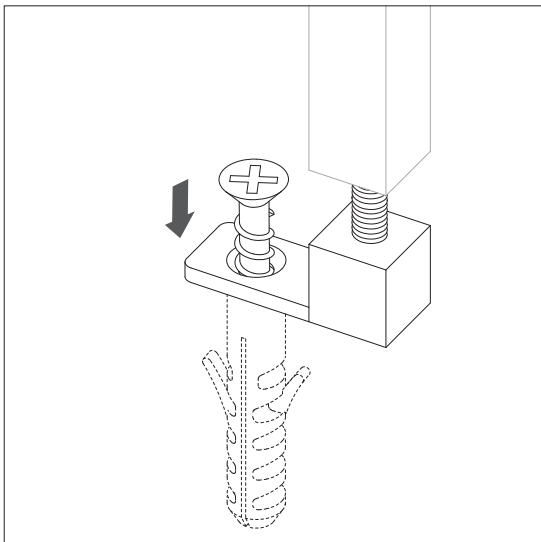

En fonction du type de sol, pour fixer les pieds, utilisez les vis et les chevilles correspondantes.

for wood
per legno
pour panneaux d'aggloméré

ETHRIO

Care and Maintenance

It is a good idea to distribute the weight evenly on each shelf and not to use the shelves themselves as a resting place to retrieve objects located above. Remember to use saucers that do not exude moisture before placing the plants on the shelves. The stability of the structure must be maintained even when placing Etrhio in new positions, without dragging it along the top or choosing places close to direct heat sources, but taking care to lift it off the ground with the help of two or more people, holding it by the columns and never by the shelves. It is advisable to first remove all objects from the bookcase, which should also be used for routine cleaning, using a microfiber cloth dampened with a neutral, non-abrasive detergent without additives. To clean steel columns, wipe thoroughly with a cloth dampened with warm water and neutral detergent.

Cura e Manutenzione

E' buona norma distribuire uniformemente il peso su ogni singola mensola e non utilizzare le stesse mensole come punto di appoggio per recuperare oggetti situati in alto. Ricordarsi di utilizzare dei sottovasi che non trasudino di umidità prima di poggiare le piante sulle mensole. La stabilità della struttura va mantenuta anche quando si colloca Etrhio in nuove posizioni, senza trascinarlo lungo il piano o scegliendo luoghi vicini a fonti di calore dirette ma avendo cura di sollevarlo da terra con l'aiuto di due o più persone, afferrandolo per le colonne e mai per le mensole. E' opportuno dapprima rimuovere ogni oggetto presente sulla libreria, accorgimento da utilizzare anche quando si procede alla pulizia ordinaria, da eseguire con un panno in microfibra inumidito con detergente neutro, non abrasivo e senza additivi. Per pulire le colonne in acciaio, strofinare a fondo con un panno bagnato con acqua calda e detergente neutro.

Entretien et Maintenance

Il est bon de répartir le poids uniformément sur chaque étagère et de ne pas utiliser les étagères elles-mêmes comme lieu de repos pour récupérer les objets situés au-dessus. N'oubliez pas d'utiliser des soucoupes qui ne dégagent pas d'humidité avant de placer les plantes sur les étagères. La stabilité de la structure doit être maintenue même lors de la mise en place d'Etrhio dans de nouvelles positions, sans le traîner sur la partie supérieure ni choisir des endroits proches des sources de chaleur directe, mais en prenant soin de soulever-le du sol avec l'aide de deux personnes ou plus, en le tenant par les colonnes et jamais par les étagères. Il est conseillé de retirer d'abord tous les objets de la bibliothèque, qui doit également être utilisée pour le nettoyage de routine, à l'aide d'un chiffon en microfibre humidifié avec un détergent neutre, non abrasif et sans additifs. Pour nettoyer les colonnes en acier, essuyez-les soigneusement avec un chiffon imbibé d'eau chaude et de détergent neutre.
